Based in San Diego, California, myCREcloud offers a diverse selection of cloud-hosted construction software applications to meet your growing business. myCRECloud is here to serve as a trusted technology partner that helps companies utilize cloud hosting solutions to run their businesses more effectively, efficiently, and free from IT headaches.

Our catalog of services include:

sage | Developer Partner

SAGE 300 CRE

Enjoy business management software, insights and intelligence and robust budgeting and planning tools for your service and real estate management.

SAGE 100 CONTRACTOR

Use the power of Sage 100 to efficiently manage job costing, business reports, budget tools, and project management.

SAGE 100 ERP

Utilize document management, accounting, CRM, and business intelligence tools to strategize with your internal and external tools.

WE HAVE YOUR BACK ON EVERY PROJECT

SEAMLESS DEPLOYMENT

Our team will transition your software to cloud-hosting solutions in a manner that does not disruptyour business and that has your team up and running without interruption.

UNPARALLELED SUPPORT

We work to ensure that your private cloud runs reliably, securely, and with back ups. If you ever require some assistance our white glove approach connects you with a real person, not a help desk
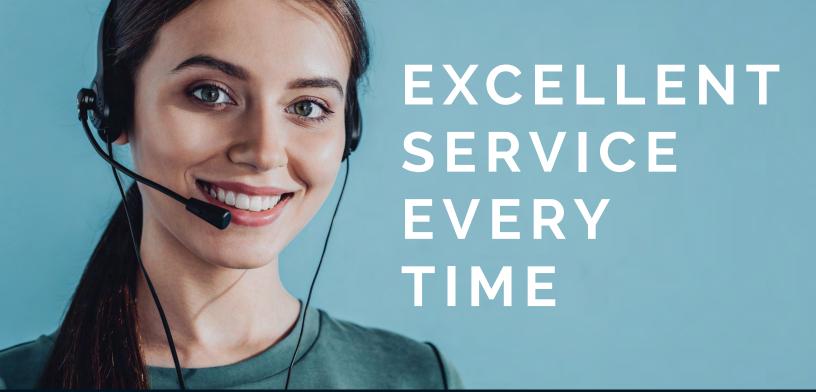

SCALABLE

We future-proof your business by creating a hosting solution that allows for rapid deployment of seats/licenses while serving up your data 24/7/365 on any device.

ENTERPRISE SERVICE

We deploy cloud hosted solutions that achieve enterprise level speed and performance without the cost of internal servers, hosting, and IT support.

EXCELLENT SERVICE EVERY TIME

"We use MyCRECloud as part of the software suite at the company I work with and they are a pleasure. Always fast and reliable service. Friendly help, and nearly a 100% uptime with very little work from us."

"There are a lot of providers in the industry, but only one myCRECloud. We're here for you whether your business scales, you need a custom solution, or if you need hands on training on getting the most out of your private cloud server."

POWERFUL, COST-EFFECTIVE, ACCESSIBLE SECURITY

With myCREcloud your files take up virtual server locations that are associated with physical servers. A tiered cloud security stack approach that divides the security technologies into various layers. By establishing and maintaining a fortified cloud infrastructure, myCREcloud reduces the number of data breaches minimizes the potential impact of breaches - all while utilizing cloud technologies to improve the organization's flexibility and scalability and to potentially lower costs for the organization.

BACKUPS & FILE PROTECTION

Our world-class security measures keep your data safe and available.

- 24/7/365 Backups and Uptime
- Biometric Identity Verification at the Equipment Rack Level
- Video Surveillance
- Hardware and Software Firewalls
- Vulnerability Scans

GEOGRAPHICALLY DIVERSE DATA CENTERS

We offer SOC 1/2/3, NIST, GDPR and PCI Compliant facilities located in geographically diverse locations.

REAL PEOPLE, REAL-TIME

- 24/7/365 Security Teams. Tools are of little value without the people and processes to react when failures, breaches or other security events occur. We keep staff on board that are always available to assist you.
- Around the clock customer support
- A team of expert engineers to keep you informed and up-to-date on the latest technology
