

planswift®

The #1 Takeoff & Estimating Software

Win more jobs with easy accurate material takeoffs!

Join the thousands of builders, estimators and contractors who are already using PlanSwift to perform their material takeoffs digitally, on their computer screen, in 1/10th the time it took them to complete on paper.

With PlanSwift's visual point-and-click interface, you can drag and drop individual products or assembled product groups directly onto a digitized blueprint. PlanSwift calculates the takeoffs automatically - saving you valuable time and effort.

KEY BENEFITS:

- Win more bids!
- Radically reduce job costs and risks.
- Minimize material shorts and overages
- Eliminate printed plans.
- Calculate takeoffs with unparalleled speed and accuracy.
- Save time with seamless integration to national plan rooms.

"The amount of time PlanSwift has saved us is staggering. PlanSwift is very intuitive, simple to use, powerful, and is dead on accurate."

- Bob C., Universal Forest Products

Easy, Accurate, Efficient

The fastest, easiest software for completing construction takeoffs.

planswift® is the ultimate software platform for streamlining the construction material takeoffs process.

PlanSwift's feature rich environment includes the ability to:

- ▶ Integrate with external applications, files and data so you don't spend time retyping quantities.
- ▶ See-through and comparative plan overlays.
- ▶ Measure linear and square footages, pitches and angles.
- ▶ Email, update, and store plans using industry standard CAD and image files.
- ▶ Download and / or upload plans to national plan rooms.

PlanSwift offers a free one hour training session with a professional estimator! No purchase necessary. Contact us at 888-752-6794 today!

Print and send plans effortlessly

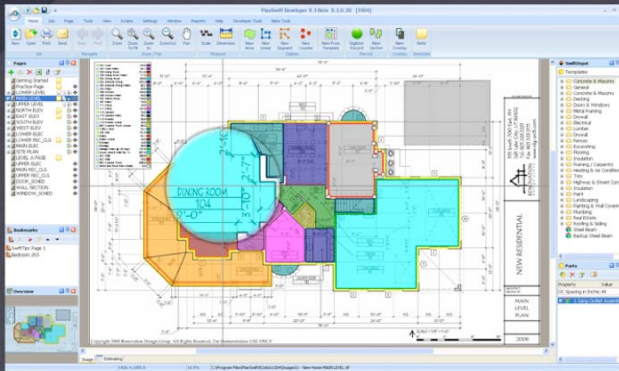

Track changes with comparative plan overlays

Load all major CAD and image file types

Load all major CAD and image file types

Fully customizable hot keys and bookmarks

Just point and click with your mouse to calculate square footage, linear footage and / or item counts

Easily navigate through plans using the overview window

With PlanSwift there is no need for old fashion rulers and highlighters

Calculate curves (arcs) and cut-outs

Identify takeoffs easily using labels and colors

Maintain accuracy with the magnification tool

Don't waste time doing takeoffs by hand.
